MYTH CHECK

Are bananas the best source of potassium?

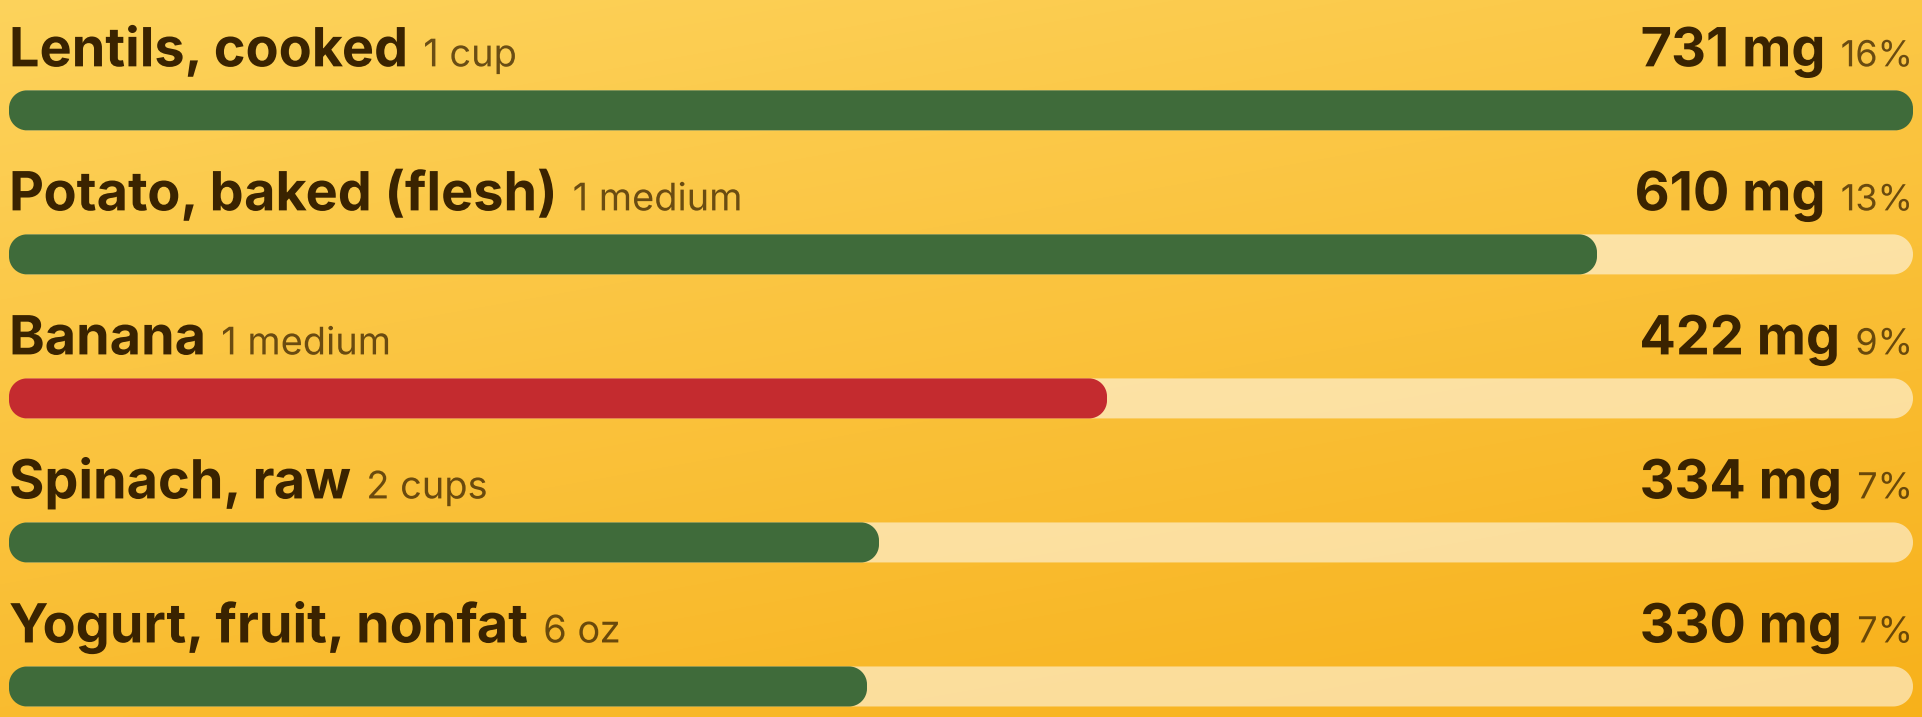

THE MYTH

~~Bananas are the best potassium source.~~

WHAT THE EVIDENCE SAYS

Bananas are a good source, but several foods supply more per serving.

Potassium per serving, from the NIH food table (Daily Value: 4,700 mg)

Potassium comes from many foods. Lentils, potatoes and bananas all count.

Sources: NIH Office of Dietary Supplements, Potassium fact sheet (health professionals)
